- Others: Redux, React Query, Socket.io, TailwindCss, Framer Motions, Firebase, MongoDB, MySQL, AWS

SUMMARY

About me and portfolio

My Portfolio

I fearlessly embrace new languages and tools thanks to my solid grasp of the fundamentals. Beyond the experiences mentioned down below, I've completed numerous projects showcased on my portfolio website. Additionally, I've collaborated with fellow developers and contributed to various projects, some of which are on my GitHub: [My GitHub](#)

EXPERIENCE

Ieworx start-up

2023 – 2023

Full-stack Developer

[ieworx.app](#)

- Was Developing a SaaS application to help construction entrepreneurs with tax and legal invoices.
- Created a Next.js-based navigation bar and contact form for the start-up's website.
- Initially responsible for an Express.js backend for the main project, but production halted until February 2024.
- Collaborated for a month and a half with the product owner, gaining valuable team experience.

Chingu

2023 – 2023

Full-stack Developer

Dev-connect

- I was a participant in Chingu's Voyage 46, where we started working on Upwork clone.
- I developed the entire back end using TypeScript and Express, incorporating live chat using Socket.io, etc.
- Additionally, I had to implement all the functionalities on the front end, such as API calls, etc.
- Overall, I gained a lot of experience using GitHub and Git and feel confident using them in a working environment.
- I had to take on a leadership role since I was the most experienced member in the group. This meant dealing with hosting and issues when it came to Git conflicts.

TechFleet

2023 – to this day

Dev-Lead For Ruminant Project

- Techfleet, a non-profit, supports small businesses with free UX design, research, and product development.
- Based on my application, I was selected to lead the dev team for this project.
- Due to client needs and long-term maintenance, we are using WebFlow.
- Despite the non-coding focus, we hold two weekly meetings, collaborate with UX and project teams, and develop soft skills.
